Bespoke Automation Solutions by

Specialise in helping Organisations to integrate AI, ML and RPA to their business processes for enhancing efficiency

Xtrasio believes in making things easier for its customers to get bespoke, secure, intelligent and optimal Artificial Intelligence based Automation solutions.

Xtrasio area of specialisation is creating new opportunities in a host of business sectors and consumer applications through Intelligent Bots, Automated Data Synthesis, Automated Business Continuity Planning & Management and Enhanced Decision-making.

Provides innovative solutions for:

- Intelligent Robotic Process Automation
- Automation of Disaster Recovery
- Business Service Availability Management

## WHY XTRASIO?

---

The foremost challenge in adoption of Artificial Intelligence (AI), Machine Learning (ML) and Robotic Process Automation (RPA) into business is lack of awareness – where the company’s culture doesn’t recognise the need or lacks understanding its usage/benefits. Lack of data or data quality issues, difficulties in identifying appropriate business use cases, customised solutions, costing involved are few other bottlenecks of smooth adoption of Automation and Artificial Intelligence, especially in small and medium sized businesses.

**Xtrasio** specialise in helping such organisations to integrate AI, ML and RPA to their business processes for enhancing efficiency.

## WHO IS XTRASIO?

---

**Xtrasio** is a technology company that believes in making things easier for its customers to get bespoke, secure, intelligent and optimal Artificial Intelligence based Automation solutions. Our area of specialisation is creating new opportunities in a host of business sectors and consumer applications through Intelligent Bots, Automated Data Synthesis, Automated Business Continuity Planning & Management and Enhanced Decision-making.

# IBAAS (IBOT-AS-A-SERVICE)

Intelligent Digital Workforce (Cognitive-Capable Bots) on demand for a digitally lean enterprise.

**Xtrasio** platform provides you with Intelligent Automation capabilities and implements 'Cognitive-Capable Bots' to automate a wide range of industry-specific operational and functional processes effectively, efficiently and spontaneously.

iBoTs are Intelligent Digital Workforce that would observe, understand, think, decide and interact as a human would with empathy.

The platform is based on **Intelligent Process Automation (IPA)** technology that converges **Robotic Process Automation (RPA)** into **Active Intelligence**. RPA merged with Artificial Intelligence enables businesses improve business efficiency and effectiveness by emulating processes, the way a human would:

Act on structured and semi-structured data to automate end-to-end processes, Appraise sentiment using Natural language Processing (NLP)

## INTELLIGENT RPA

Your “Intelligent Automation Platform” that understands, learns, interacts and solve problems as a human would.

**Xtrasio** use Artificial Intelligence (AI) and Machine Learning (ML) algorithms to sense, predict, analyse and solve issues.

**Xtrasio** next generation Cognitive Computing and Machine Learning system is aimed to deliver end-to-end Interactive solutions that dramatically improve the operational efficiencies of enterprises (of all sizes) in the global marketplace.

## INTELLIGENT BCP AUTOMATION

An Intelligent platform that integrates People, Processes and Technology – an end-to-end automated approach towards Business Continuity Management and Planning (BCMP).

**Xtrasio** Business Continuity Management (iBCM) solution that supports the entire BCM lifecycle, as identified by global industry standards (all embedded in a BCM policy compliance workflow engine)

# INTELLIGENT RECOVERY AS A SERVICE (IRAAS)

**Enterprise-class Intelligent Recovery solution for organisations of all sizes.**

**When disaster strikes, it can hinder productivity & cause downtime that can cripple the organization. Financial losses due to IT Failures are massive worldwide.**

**iRaaS comes to your organisation's rescue in such situations providing an enterprise-class Intelligent recovery solution with high availability, reliability, flexibility and affordable costs to protect your critical data and maximizing your ROI within short span of time.**
